When first looking into ideas for projects to take on, however, it can feel a little daunting.

Top 13 Science Experiments For Middle School Students ...

It's the social engineering that's the killer. Almost six years ago, I was the editor of a single-topic issue on energy for Scientific American that included an article by Princeton University's Robert Socolow that set out a well-reasoned plan for how to keep atmospheric carbon dioxide concentrations below a planet-livable threshold of 560 ppm.
