It routes the water out from the cabin through the firewall and down to the ground. (this is the water puddle you see under the car when the AC is running just behind the right front tire. If this rubber hose gets dislodged from the evapcore housing, the water will drain nicely onto the passenger floor and under the carpet.

wet carpet [Archives] - GM-Volt: Chevy Volt Forum

Jun 20 2011, 9:09pm When the weather warmed up, I noticed that water (water, not coolant) will drip under the truck after i park it (usually it's after a longer trip). It's always on the passenger side, and I can hear it hissing on part of the exhaust system. I would put the drip right under the passenger side seat, or in that area.
