A10 Networks® Harmony Controller SSLi App 5.1.0-v3.0 Release Notes fr A10 Thunder® Series and AX™ Series 12 March 2020

**A10 Networks® Harmony Apps Release Notes**

A10 Thunder™ and AX Series deliver industry-leading return on investment (ROI) by leveraging A10's 64-bit Advanced Core OS (ACOS), with a scalable shared-memory parallelism architecture that leaps the competition in scalability and flexibility.

**A10 Networks Partner Technical Enablement Training**

Thunder is being positioned by A10 as its new, flagship line of ADCs following its legacy AX Series controllers, which has been seen as A10's main ADC offering since 2007.

**A10 Bulks Up Latest 'Thunder' ADCs With Security, SDN Services**

A10 Networks is a U.S. public company specializing in the manufacturing of application delivery controllers (software and hardware). Founded in 2004 by Lee Chen, co-founder of Foundry Networks, A10 originally serviced just the identity management market with its line of ID Series products. In early 2007 they added bandwidth management appliances (EX Series).

**A10 Networks - Wikipedia**

The A10 Thunder and AX Application Delivery Controllers (ADC) are vulnerable to CVE-2014-0224- SSL/TLS Man-in-the-Middle attack. The vulnerability is limited to deployments where the Thunder or AX device is acting like an SSL client and is connecting to a back-end server that is running OpenSSL 1.0.1 or 1.0.2- beta1.

**OpenSSL Security Advisory - A10 Support**

The Thunder series is the successor to A10's existing AX line of ADCs. One of the key differences in the Thunder series overall is the use of new processors, which improve performance. At the top end of A10's new UASG family sits the Thunder 3030S, which supports up to 750,000 connections per second of unencrypted throughput.
