For this example, using an 80% efficient furnace, the 1900 square foot home above would require a 90,000 Btu input furnace that produces 72,000 Btu's of heating, which is close enough to the 76,000 Btu's required using the climate heating factor.

Furnace Sizing Calculator - Air Conditioning and Heating

Lennox ® gas and oil furnaces are engineered to deliver perfect warmth, efficiency and energy savings. Delivering precise comfort and temperature control, Lennox furnaces can keep your home to within 0.5 degrees of your ideal temperature. As quiet as they are efficient, Lennox furnaces also startup and run perfectly quietly, helping to preserve the peace and quiet of your home.

Furnaces | Oil & Gas Home Furnaces | Lennox

Forced air systems use a furnace or heat pump to heat the air and then disperse it through the house via ductwork and in-room vents. Once the temperature is set at the thermostat, cold air from the home is pulled into the system where it passes through the air filter, removing allergens like pollen and dust.
