## **A Philosophical Conception Of Propositional**

The philosophical conception of ML is grounded by a precise theory of propositions, and in particular, by the theory of propositions derivable from the theory of relations developed in Zalta, [1988a], and.2On this theory, propositions are defined as 0-place relations that are governed by: (a) a derived abstraction schema that comprehends the domain of propositions, and (b) theoretically-defined identity conditions which permit necessarily equivalent propositions (i.e., propositionspand

**Propositional Modal Logic**  
Conception of Propositional Modal Logic  
In philosophy, a proposition is the meaning of a declarative sentence, where "meaning" is understood to be a non-linguistic entity which is shared by all sentences with the same meaning.

## **A Philosophical Conception Of Propositional Modal Logic**

CiteSeerX - Document Details (Isaac Councill, Lee Giles, Pradeep Teregowda):  
The definitions of propositional modal logic are traditionally formulated in the following way. 1 First, a formal language is defined, usually with atomic formulas  $p, q, \dots$  and complex formulas involving the connectives  $\neg, \rightarrow$  and the operator. Models  $M$  for this language are then defined as triples  $\langle W, R, V \rangle$  in ...

may be objects of belief that I call propositions ." (1905: 494) We only

## **Russell's Conception of Propositional Attitudes in ...**

In traditional logic, the role of propositional functions is approximately held by terms. In traditional logic, statements such as 'dogs are mammals' are treated as postulating a relation between the terms 'dogs' and 'mammals'. A term is treated either extensionally as a class of objects or intensionally as a set of properties.

## **Propositional Function (Stanford Encyclopedia of Philosophy)**

The notion of a propositional content plays a central role in contemporary philosophy of language. Propositional content makes up both the meaning of sentences and the content of propositional attitudes such as belief. One particular view about propositional content has been dominant in analytic philosophy, namely the Fregean

### **Act-Based Conceptions of Propositional Content ...**

According to this theory, the basic bearers of representational properties are particular mental or spoken actions. Propositions are types of these actions, which we use to classify and individuate our attitudes and speech acts. This theory abandons several key features of the traditional Fregean conception of propositional content, including the idea that propositions are the primary bearers of truth conditions, the distinction between content and force, and the concept of entertainment.

### **Propositional Content - Oxford Scholarship**

In philosophy, a proposition is the meaning of a declarative sentence, where " meaning " is understood to be a non-linguistic entity which is shared by all sentences with the same meaning.

Equivalently, a proposition is the non-linguistic bearer of truth or falsity which makes any sentence that expresses it either true or false.

## **Proposition - Wikipedia**

In terms of both propositional and first-order logic the concepts of necessary and sufficient conditions are intimately related to the concept of the conditional (i.e. a statement of the form "if  $p$ , then  $q$ ") as the following canonical account makes clear. [1] Where  $S(p, q)$  means "  $p$  is a sufficient condition for  $q$  " and  $N(q, p)$  means "  $q$  is a necessary condition for  $p$  ",  $p \rightarrow q$  means "if  $p$ , then  $q$  ," and  $p \equiv q$  means "  $p$  and  $q$  are logically equivalent ...

## **Necessary and Sufficient Conditions - Introduction to ...**

The term 'proposition' has a broad use in contemporary philosophy. It is used to refer to some or all of the following: the primary bearers of truth-value, the objects of belief and other "propositional

attitudes" (i.e., what is believed, doubted, etc. [ 1 ] ), the referents of that -clauses, and the meanings of sentences.

## **Propositions (Stanford Encyclopedia of Philosophy)**

The traditional "definition of propositional knowledge," emerging from Plato's Meno and Theaetetus, proposes that such knowledge — knowledge that something is the case — has three essential components. These components are identified by the view that knowledge is justified true belief.

## **Propositional Knowledge, Definition of | Encyclopedia.com**

Chapter 1 is a review of the standard syntax and semantics of propositional logic, culminating in a definition of translatability of one theory into another and equivalence of theories (sometimes also known as homotopy equivalence) in the context of purely propositional theories.

Noun. An understanding retained in the mind, from experience, reasoning and/or imagination; a generalization (generic, basic form), or abstraction (mental impression), of a particular set of instances or occurrences (specific, though different, recorded manifestations of the concept). Frege's concepts are very nearly propositional functions in the modern sense.

## **Concept vs Philosophy - What's the difference? | WikiDiff**

One particular view about propositional content has been dominant in analytic philosophy, namely the Fregean conception of propositions as abstract mind-independent objects that come with truth conditions. But propositions in this sense raise a range of issues, which have become a center of debate in current philosophy of language.

## **Act-Based Conceptions of Propositional Content ...**

Propositional knowledge is not so different from a priori and explicit knowledge. The key attribute is knowing that something is true. Again, mathematical equations could be an example of propositional knowledge, because it is knowledge of something, as opposed to knowledge of how to do something.
