NYS GIS Clearinghouse

GIS stands for "Geographic Information System". GIS is a very broad term, and trying to get a consistent definition can be tricky. Ask ten different GIS users and you will likely get ten different answers. It could be argued (and the propeller heads often do) that any digital data that contains location based information is in fact a GIS. ...

What is GIS: A Beginner's Guide - Geoawesomeness

A Geographic Information System (GIS) is a computer system that analyzes and displays geographically referenced information. It uses data that is attached to a unique location. Most of the information we have about our world contains a location reference: Where are USGS streamgages located? Where was a rock sample collected? Exactly where are all of a city's fire hydrants?

What is a geographic information system (GIS)?

The GIS keeps track of this relationship allowing a user to click on the map to get the data or click on the record to find the parcel on the map. It allows questions to be framed geographically GIS is a way of organizing database records by tying them to geographically synchronized slices of the world so that "where" questions can be asked ...
