With the Abbey Road Plates plugin, pre-delay is variable from 0 to 500 ms. Because the plate is flat, the echoes multiply rapidly as soon as the driver transfers vibrations to the plate. This immediately gives a highly diffused, smooth sound—diffusion doesn't take time to build up, as it does with acoustic spaces.

The extra DSP is often the sign of oversampling at work to get the maths more precise. I noticed Waves tends to push their Abbey Roads plugins further in terms of quality and trying to get it get it precise without aliasing artefacts. The folks at Abbey Roads usually sign off on these, so it would have to past their golden ear standard first.
