### [PDF] Astronomy activity and laboratory manual answers ...

Astronomy is an observational science, as opposed to most of the rest of physics, which is experimental in nature. Astronomers cannot create a star in the lab and study it, walk around it, change it, or explode it. Astronomers can only observe the sky as it is, and from their observations deduce models of the universe and its contents.

### Astronomy 113 Laboratory Manual - UW-Madison Astronomy

74 ASTRONOMY ACTIVITY AND LABORATORY MANUAL Although the stars may look alike (real stars all appear as bright points, even through a powerful telescope), one of these stars is actually much closer to Earth than the others. You can determine which star is the close one by recalling how stellar parallax relates to dis- tance, this time in the reverse sense: the larger a star's parallax, the closer the star.
