have access of Folder Structure 1. for AutoSys Job log 2. for AutoSys profile and parameters 3. for Shell Scripts Please share some information that how to create a job using GUI.

GUI for Autosys. - Unix

AutoSys is an Automated Job scheduler used for creating a job, apart from that, it is also

Access Free Autosys User Guide For Unix

used for controlling and monitoring it. In this context, a job can be referred as a set of batch program or script program, which can be executed for reporting and handling of the un-managed task. The command or job can be programmed using some predefined keywords and attributes, for running AutoSys; you need to have a Windows or UNIX / LINUX machine.

AutoSys Reference Guide - Tutorial for Beginners

How AutoSys does really works? As you know the application can run on several servers, but when a client needs to use it, he needs to have Windows or Linux/UNIX computer; the applications offer a Graphical User Interface (G.U.I), tasks can be programmed

Access Free Autosys User Guide For Unix

using Java or UNIX script programming. A task is defined with some initial set of conditions.
