Browse the free eBooks by authors, titles, or languages and then download the book as a Kindle file (.azw) or another file type if you prefer. You can also find ManyBooks' free eBooks from the genres page or recommended category.

Building A Science Of Nursing

Building the Science of Nursing Education: Foundation for Evidence-Based Teaching and Learning is the culmination of a seven-year project by the NLN Task Group on Teaching-Learning Paradigms. The contributors, all seasoned nurse educator-scholars, thoroughly investigated existing studies of nursing education practice and created the first model for building a science of nursing education, which, it is hoped, will serve as a foundation for continuing scholarship in the field.

For nursing to be a human science, nurses must recognize themselves as scientists. The work they do in the provision of care to individuals, families, and communities may be viewed from a lens of science that is simultaneously physical (hard), applied (soft), and human. Scientific Method for the Physical Sciences (Traditional)

Foundations of Nursing Science

establishing structures to support nursing research and building the cadre of scientists needed to conduct investigations, to the stage of focusing on the identification and study of the phenomena which comprise the body of knowledge needed for practice. A number of directions or priorities for nursing research

Nursing science: the challenge to develop knowledge.

To hold true to our heritage and meet the needs of our growing campus community, A&M-Commerce will construct a new Nursing and Health Sciences Building in this centennial year. The facility will house the Department of Nursing, the Department of Health and Human Performance, and the Biomedical Institute for Regenerative Research.
