Capture One Pro 9 | Performing Essential Adjustments

Capture One (also known as Capture One Pro) is photo editing software, developed by Phase One. As well as image editing it performs image cataloguing, raw image file processing, and tethered photography. Capture One works with raw files from many different digital cameras as well as TIFF and JPEG image files.

Capture One - Wikipedia

New Features for Tethered Capture in Capture One Pro 9.1. If you regularly shoot tethered to Capture One Pro 9, we have made a couple of changes to improve stability and workflow. If you use a Canon camera, we have changed the tethering engine to a Phase One developed system that is not reliant on the SDK provided by Canon.

What is new in Capture One Pro 9.1?

Historically, Capture One Pro software has been regarded primarily as an amazing RAW file converter for high-end cameras. With its newest release, Capture One Pro 9 goes well beyond its storied RAW conversions to become one of the most powerful image-processing applications on the market, addressing the imaging workflow from capture to print.
