Activities - Chapter 4 Activity 4a - Congruent Triangles This activity explores the issues involved with solving triangles using the Law of Sines and Law of Cosines. It is a geometric exploration and ideas learned here will help in the decision-making process for solving triangles.

Activities - Chapter 4 - Trigonometry

So we know that two triangles are congruent if all of their sides are the same-- so side, side, side. We also know they are congruent if we have a side and then an angle between the sides and then another side that is congruent-- so side, angle, side. If we reverse the angles and the sides, we know that's also a congruence postulate.
