One of the major contributions to the emerging field of evolutionary economics has been the publication of An Evolutionary Theory of Economic Change by Richard Nelson and Sidney G. Winter. These authors have focused mostly on the issue of changes in technology and routines , suggesting a framework for their analysis.

Evolutionary economics - Wikipedia

In 1958 American economists Alfred H. Conrad (1924-1970) and John R. Meyer (1927-2009) founded New Economic History, which in 1960 was called Cliometrics by American economist Stanley Reiter (1925-2014) after Clio, the muse of history. It uses neoclassical economic theory to reinterpret historical data, spreading throughout academia, causing economic historians untrained in economics to disappear from history departments.

History of economic thought - Wikipedia

If economic theories are to explain realities, they must explain economic evolution. Evolution means Darwin and natural selection. Attempts to develop an evolutionary theory of economics have consequently sought to adapt Darwin's theory to the economic sphere. The transfer looks easy in terms of 'survival of the fittest'.
