Economics of Sea Transport & International Trade - ShipScope

Global trade is impossible without transportation, making efficient transport a key trade facilitator. By definition, almost all the cargo carried by maritime shipping is considered to be international trade. Transport costs (both freights costs and time costs) constitute a key component of total trade costs. These trade costs also include other costs incurred in getting goods to final users other than the marginal cost of producing the good itself, such as policy barriers, information costs ...
