The Efficiency Movement was a major movement in the United States, Britain and other industrial nations in the early 20th century that sought to identify and eliminate waste in all areas of the economy and society, and to develop and implement best practices. The concept covered mechanical, economic, social, and personal improvement. The quest for efficiency promised effective, dynamic management rewarded by growth. As a result of the influence of an early proponent, it is more often known as Ta

Efficiency Movement

The Taylor Society was an American society for the discussion and promotion of scientific management, named after Frederick Winslow Taylor. Originally named The Society to Promote The Science of Management, the Taylor Society was initiated in 1911 at the New York Athletic Club by followers of Frederick W. Taylor, including Carl G. Barth, Morris Llewellyn Cooke, James Mapes Dodge, Frank Gilbreth, H.K. Hathaway, Robert T. Kent, Conrad Lauer and Wilfred Lewis. In 1925 the Society declared that it '

Taylor Society - Wikipedia

Copley, Frank Barkley. (1923). Frederick W. Taylor: Father of Scientific Management, 2 volumes. New York: Harper. For many years this was the standard biography, but it tends to be hagiographical. Haber, Samuel. (1964). Efficiency and Uplift: Scientific Management in the Progressive Era, 1890-1920. Chicago: University of Chicago Press. An analysis of how some Taylor disciples created reform programs "without an appeal to conscience."

Taylor, Frederick W. | Encyclopedia.com

REPORT AND TESTIMONY, Vol. 1 (Washington, 1916), p. 782. For a description of Taylor's aberrant personality, including his habit of chaining himself at night to "a harness of straps and wooden points", see Samuel Haber, EFFICIENCY AND UPLIFT: SCIENTIFIC MANAGEMENT IN THE PROGRESSIVE ERA, 1890-1920, Chicago, 1964.

The stopwatch and the wooden shoe: Scientific management ...

the development of scientific management with a "partial solution of the labor problem," notably the effort to find a "scientific" basis for the incentive wage.¹ Frederick W. Taylor, the "father" of scientific management, devoted more attention in his speeches and writings to time study, the "efficiency" of the workmen, and labor issues than

Scientific Management, Systematic Management, and Labor ...

Frederick Winslow Taylor. Frederick Winslow Taylor (1856-1915) consolidated a system of managerial authority, often referred to as scientific management, that encouraged a shift in knowledge of production from the workers to the managers. His system broke up industrial production into very small and highly regulated steps and required that workers obey the instructions of managers concerning the proper way to perform these very specific steps.
