(OORP) method will be used to implement a limited and functional prototype for the registration system. The prototype will be a working example of part of the system for demonstration and proof of concept purposes only.

System Requirement Specifications (SRS)

The SRS can be a single document communicating functional requirements or it may accompany other software documentation like user stories and use cases. We don't recommend composing SRS for the entire solution before the development kick-off, but you should document the requirements for every single feature before actually building it.
