Integrated Nutrient Management: Concept and Components

An integrated soil fertility management aims at maximizing the efficiency of the agronomic use of nutrients and improving crop productivity. This can be achieved through the use of grain legumes, which enhance soil fertility through biological nitrogen fixation, and

Bookmark File PDF Integrated Nutrient Management Soil Fertility And

the application of chemical fertilizers.

Improving soil fertility | IAEA

Integrated soil fertility management (ISFM) is a means to enhance crop productivity while maximizing the agronomic efficiency (AE) of applied inputs, and can thus contribute to sustainable intensification.
