Linear algebra moves
steadily to n vectors in
 m -dimensional space.
We still want
combinations of the
columns (in the column
space). We still get m
equations to produce b
(one for each row).
Those equations may

Online Library Linear Algebra 4th Edition Solutions

or may not have a solution. They always have a least-squares solution. The interplay of columns and rows is the heart of linear algebra.

The fourth equation is $x_4 = -5$, and the other equations do not contain the variable x_4 . The next two steps should be to use the variable x_3 in the third equation to eliminate that variable from the first two equations. In matrix notation, that means to replace R_2 by its sum with 3 times R_3 , and then replace R_1 by its sum with -5 times R_3 . 6.
