Mitsubishi Lancer Idling problem 1.5L 4G15

Since the weather has turned cold I've noticed that when I start up my ST1300 when cold it will idle very fast until it warms up to at least one bar. When I say it idles really fast I'm talking about 3-4 thousand RPM. When I first start her up she idles slightly faster than normal which is to be expected.

Really fast idle when cold | ST1300 Tech | ST-Owners.com

Your Mitsubishi's IAC (Idle Air Control) valve can become dirty and clogged over time. If your Mitsubishi stalls frequently or begins to have a strange idle, it's time to clean the IAC valve. A dirty IAC valve cannot control the engine's idle speed very efficiently--hence the poor idle and frequent stalling.
