The otoscopic exam is performed by gently pulling the auricle upward and backward. In children, the auricle should be pulled downward and backward. This process will move the acoustic meatus in line with the canal. Hold the otoscope like a pen/pencil and use the little finger area as a fulcrum. This prevents injury should the patient turn suddenly.

Otoscopic Examination - Loyola University Chicago

For girls, both labia majora and minora should be seen. Normal hymenal tissue is light pink with a central orifice between the labia minora. White or mucoid discharge (as in the photo) is normal. For boys, the penile shaft should appear straight with an intact foreskin. Testicles should be palpable bilaterally
