PL/SQL stands for Procedural Language/Structured Query Language and is an expansion of the SQL language developed by Oracle. It includes a set of procedural features (IF THEN ELSE logic, loops, variables) in addition to the SQL language. The code is written and executed on an Oracle database.

PL/SQL Tutorial: Chapter 1 - Database Star

"Oracle 11g: SQL" shines in this regard! The explanations of what happens "behind-the-scenes" when you create a join or query a virtual table are so exceptionally accurate and well-explained, that not only could I create complex joins, I was even able to find and correct errors in the online tests that were part of our "web-enhanced" college ...
