### Painting a Target on HPV | Cervical Dysplasia Treatment ...

Painting a Target on HPV (2015) by Dr. Nick Leroy is a welcome publication in the field of research on this virus. Much of what has been written on HPV for the non-medical reader (who is likely searching out this information because of an HPV-positive diagnosis) is either too scientific to be understandable or too anecdotal to be helpful.

### Dr. Nick LeRoy - Owner - Dr. Nick LeRoy | LinkedIn

The putative target cell in the cervix for HPV infection is squamous metaplastic epithelium, because most CIN and cervical cancers occur within the transformation zone of the cervix [151]. The infection can become latent before or after a lesion develops.

### Human Papillomavirus Type 18 - an overview | ScienceDirect ...

Advances in human papillomavirus (HPV) research have led to the development of three vaccines in the past decade, but they're not recommended for adults older than 26 due to limited effectiveness in this population. Given that HPV is the leading cause of cervical cancer and a major cause of other cancers, scientists are searching for more solutions.

### New Clues About How HPV Spreads In the Body

Background. With several countries having now implemented HPV vaccination programs, data on uptake are beginning to emerge. Although the age range for comparison varies internationally, there is a vast difference in HPV vaccine uptake across these countries, from very high—86.7 % for 3 doses in adolescent females of the target age in the UK (2013–2014) [ ]—to very low—37 % for 3 doses ...
