10 Facts About School Attendance - Attendance Works

Overall, more than 20 percent of students in high school are chronically absent compared with more than 14 percent of students in middle school. The chronic absenteeism rate was the lowest for elementary school students, at almost 14 percent. For more information on how we defined grade levels, see the data notes .

Chronic Absenteeism in the Nation's Schools

Student absenteeism can lead to low academic achievement, dropping out of school, delinquency and gang involvement. School districts that have established multi-systemic approaches and policies pertaining to student absenteeism typically experience fewer numbers of dropouts and a greater number of graduates.

Attendance, Truancy & Chronic Absenteeism

A student's school attendance is a reference point in determination of academic success. This is why most schools highly discourage absenteeism. Due to foreseen or unforeseen circumstances such as illness or death of a family, a student might end up missing school for a day or a couple of days.

Apology Letter for Absence from School Due to Illness ...

Excessive school absenteeism is often linked to poor school academic achievement, so school attendance by both teachers and students plays an integral role in the success and educational advancement levels of any academic institution and all students enrolled.

The Effects of Excessive Absenteeism in Schools | The ...

When students are not in school, they are falling behind. Chronic absenteeism impacts all students—no matter their age. Students that miss just two days a month for any reason are more likely to not read at grade level, and more likely to not graduate. Attendance can be a signal that a student needs support.

Attendance, Chronic Absenteeism, and Truancy | OSPI

Schools are required to submit Student Absence Reports twice each year on those students with serious attendance issues that have been identified during the current academic year i.e. students that have been absent from school for a cumulative total of twenty days or more falling within the following categories:

Reporting Absenteeism - Tusla - Child and Family Agency

A student is considered chronically absent after missing 10 percent or more of school days. This includes both excused and unexcused absences. Missing 10 percent of school days would be approximately 18 days in a normal 180-day school calendar - just two days per month.

Chronic Absenteeism | Oklahoma State Department of Education

While chronic absence presents academic challenges for students not in class, when it reaches high levels in a classroom or school, all students may suffer because the resulting classroom churn hampers teachers' ability to engage all students and meet their learning needs.

The Problem - Attendance Works

Trends in student absenteeism From 1994 to 2017, the percentage of eighth-grade students who reported that they were absent from school for three or more days in the last month was relatively stable, in the range of 19 percent to 22 percent.

Student Absenteeism - Child Trends

While it may seem like common sense that students have to be in school to learn, chronic absenteeism persists in K-12 schools, impacting as many as 7.5 million children a year. Students who are chronically absent — meaning they miss 10 percent or more of the school year — are at serious risk of falling behind in school.
