Metal fabrication is the creation of metal structures by cutting, bending and assembling processes. It is a value-added process involving the creation of machines, parts, and structures from various raw materials. Typically, a fabrication shop bids on a job, usually based on engineering drawings, and if awarded the contract, builds the product. Large fab shops employ a multitude of value-added processes, including welding, cutting, forming and machining. As with other manufacturing processes, bo

Metal fabrication - Wikipedia

The '5-S' Method for Sheet Metal Shop Organization. HVAC duct fabrication shop owners pride themselves on having a neat, clean, and efficient shop. Using Lean techniques, owners can improve the shop's organization further without major capital investments.
