### **Single Port Laparoscopic Surgery In**

Single-port surgery is surgery that is performed through a single port - or incision - in a patient's navel (belly button). Cleveland Clinic urological surgeon Jihad Kaouk, MD is among only a handful of surgeons across the nation now performing these procedures. Single-port surgery is a form of minimally invasive - laparoscopic - surgery.

Single-incision laparoscopic surgery (SILS) originated from the concept of natural orifice transluminal endoscopic surgery (NOTES), which emerged as an option to laparoscopy. The access to the peritoneal cavity through normal viscerae and the risk for intra-abdominal contamination was, however, a troublesome concern with NOTES.
