Sociolinguistics and Language Education

The author next describes three major strands of investigation in sociolinguistics: language variation, language contact, and language change. Work in the area of language variation is based largely on the groundbreaking work of William Labov, whose findings have been challenged by current research on language hybridity.

Sociolinguistics and Language Education | SpringerLink

Sociolinguistics is concerned with the relationship between language use and social variables. One of the major debates in the field of sociolinguistics is whether to take social or linguistic factors as primary in investigating this relationship. As evidence of this debate, Wardhaugh (1992) and others make a distinction between sociolinguistics and the sociology of language.

Sociolinguistics and Language Education | SpringerLink

Research on language education has sought answers to the question of how the development of spoken and written language can be fostered, from their origins in early infancy to their mastery as systems of representation for communication with others and for the inner control of thinking and feeling. Thanks to the input of sociolinguistics in educational research, the ways in which social equality can be enhanced through education have also received attention.
