Enjoy a comfortable home environment with a Trane Wi-Fi connected thermostat with controls and adjust heating and cooling settings from anywhere.

Thermostats & Controls - Trane-Residential

Where to start: troubleshooting a heat pump. If your heat is not working, start by checking the thermostat. Is it turned on and set to heat? Try setting the temperature 2 to 4 degrees above room temp. (When troubleshooting heat pumps in cooling mode, follow this same process but set the temperature below room temp instead of above.)

Heat Pump Troubleshooting Guide | Trane

Trane is a major manufacturer of residential furnaces, air conditioners, heat pumps and other HVAC systems, and also sells a wide range of wall thermostats designed to be paired with its HVAC equipment. Virtually all Trane thermostats are made by Honeywell and simply repackaged and rebranded with the Trane name.

How to Program a Trane Thermostat | Hunker

Heat pump thermostats have a simple job. They work to turn the heat pump on or off based on input criteria, such as time, current temperature, or other smart home features (geofencing, for example). The basic function is temperature based. When the interior temperature falls below the set number, the thermostat switches the heat pump on.
