each of the UNIX System V administrative tasks, including managing file systems & users, setting up basic networking, maintaining security, tuning the system to optimize performance, and administering printers.

Unix System V Release 4 by AT&T - Goodreads

I am running AT&T UNIX System V Release 4 Version 2.1 inside VirtualBox, and want to create a new "user account" for myself. At first, I simply created a new user with the `useradd` command, but didn't specify a group. When I logged in, I didn't even have a high enough permission level to create a new directory in my home folder.
